

## RoHS, REACH & WEEE Compliance Statement

### Who needs to comply?

The RoHS directive places the responsibility for Electrical or Electronic Equipment compliance on the producer of the Electrical or Electronic Equipment. It is the producer who must determine whether its product is Electrical or Electronic Equipment under the directives, and, if so, ensure its compliance.

Cables are classed as components so there is no general requirement for cables to comply with WEEE implemented 1st July 2007.

Where cables are used as a component in Electrical or Electronic Equipment covered by the directives, the producer must satisfy himself that such equipment will be RoHS compliant therefore it is best practice for a producer to ensure cable is compliant with RoHS directive.

### Do Clynder Cables Ltd comply?

All cables manufactured since May 2017 are compliant to EU directives 2011/65/EC and EU/2015/863 which require CE marking on our reels and that the following substances are not contained above the stated levels:

Lead	0.1% by weight
Mercury	0.1% by weight
Hexavalent chromium	0.1% by weight
PBB	0.1% by weight
PBDE	0.1% by weight
Cadmium	0.01% by weight
DEHP	0.1% by weight
BBP	0.1% by weight
DBP	0.1% by weight
DIBP	0.1% by weight

### REACH

Our products comply with EU Directive 2006/121/EC and subsequent amendments to regulation EC1907/2006 and do not contain any SVHCs.

### WEEE

As all our products are cable we are not affected by the WEEE regulations because cable is classified as a component not equipment.
